

Fliesenprofi Washbucket 22L

next generation 2025

Reinforced handle holder:

the reinforced handle holder provides a better grip and increases the service life, even with higher loads

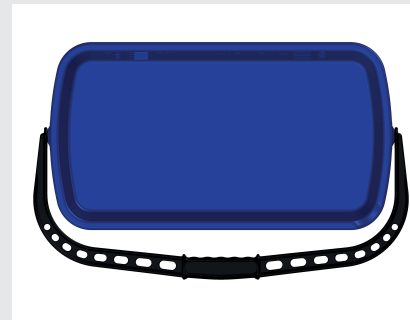

Made in Germany:

place your trust in the highest quality every washing bucket is manufactured in Germany, meets the highest standards and now also carries this engraving on the floor

Improved handling:

the adaption of the handle, in height and length, prevents fingers from getting caught between the handle and the edge of the bucket

Improved stackability:

Thanks to an optimised shape the buckets can now be stacked easier and safer - perfect for a space-saving storage and better organisation

Reinforced floorroller supports:

The new, reinforced floor roller mounts guarantee a longer service life and more stability, especially for intensive use
